

it's all about
DATA
INTEGRITY

Now, with DataGate, you can add beauty
and protection to any wall.

Dirt, dust, moisture — almost anything can find its way into your unoccupied jacks. When it's time to make a connection, there goes your signal integrity. Fortunately, now Molex Premise Networks has a permanent solution — DataGate.™

DataGate is a patented feature of our new RJ-45 modular jack. It provides an automatic shutter (we call it a "gate") that springs forward from a built-in recess in the jack body when a plug is removed. The unoccupied jack stays protected, and so does your data.

Just one more way we help you ensure data integrity, and just what you would expect from Molex Premise Networks. For more information about DataGate and other innovative cabling products, call us today at 978-772-5824.
