

It's Like Nothing You've  
Ever Seen Before.

it's all about  
**DATA**  
**INTEGRITY**

And It Will Change the  
Way You Think of Moves,  
Adds and Changes.  
Forever.

Tired of endless recabling expenses and the time loss caused by routine moves, adds and changes? The truly unique RICI® (Rapid Inter-Connect Interface)\* from Molex Premise Networks enables you to easily disconnect your work area outlets from the closet feeder cables. So if you need to move a block of cubicles, or tear out a few walls, there's no need to pull and punch down new cables. RICI puts you in control.

And with RICI's integral shell and tuned jack/plug design, you're always assured of maximum data throughput. A RICI consolidation point also exceeds the EIA/TIA 568a TSB-75 Cat 5E performance standards.

The bottom line? You save time and money by eliminating the hassles usually associated with moves, adds and changes. And even more importantly, the integrity of your data is assured. It's just what you'd expect from Molex Premise Networks.

For more information about the RICI and other innovative cable network solutions, call Molex Premise Networks today at 1-800-866-3827.
